

Open ERP

Open Source Management Software

PEG

PEG is the No1 Independent Engineering Consultancy. Established for the cement industry in 1965, it constructed the world's first fully automated inline cement-plant. PEG has been innovating ever since, presently with a greater level of experience and technical.

PEG has brought together industry leading experts from around the world who are dedicated to saving their clients, time and money. Based in Geneva, Switzerland, it offers a vast range of services spanning the cement, environment and infrastructure industries and has ongoing projects all over the globe.

▶ AT A GLANCE

» Why Open ERP?

- Flexible
- all functional modules

» Benefits

- Multi-currencies and Multi-companies accounting
- Management and sharing of Multi-companies resources (profitability by project, by company, etc)
- Management of Project "tree structure" with several phases and sub-phases (intermediate total, profitability at each level)
- Management of standard processes (expense notes, timesheet, etc)
- Commercial management (offers, CRM)
- Electronic invoicing / reconciliation in Switzerland via DTA and BVR banks
- Complete flow of management of purchases and deliveries
- Financial budget, project budget and cash budget.

Open ERP was chosen thanks to its flexibility in the implementation and its growing capabilities. Along with the possibilities offered by this tool, it was also the engine for additional developments supported by Camptamp SA and Tiny Sprl.
