

The Vaud canton administration has chosen OpenERP in order to manage the relationship with companies located into the canton.

Vaud Canton Administration

The Capital of the Vaud Canton of Switzerland is Lusanne. The Canton gives a lot of importance to economic dynamism and provides a multitude of services to PME's, including financial services as well as support in company creation.

OpenERP has succeeded in creating a wide network, bringing together the Vaud Canton and its companies. This synergy would not have been possible without a software such as OpenERP, perfectly adapted for relations between partners as well as for service sectors.
