

WIRCOM ARGENTINA :

Wircom Argentina offers a broad portfolio of state-of-the-art telecommunication services through their three business departments : Wircom Solutions, technology provider and technical support; Wirtel, VoIP provider; and Wirnet, broadband Internet Provider.

Wircom Argentina specializes in providing voice, data and video services, Internet access to residential and commercial clients. This has lead to a steady growth in all their business areas. Wircom Argentina is a National Telecommunication Carrier, which confirms the commitment of Wircom Argentina S.A. to work with the highest levels of excellence to meet their clients needs.

AT A GLANCE

Why Open ERP?

- Innovative
- Progressive
- different modules.

Benefits

- ability to match business needs coupled with its open source license.
- Vast experience in ERPs administration
- ensure the support and service required by their clients communication needs

Wircom Argentina chose Open ERP as it is the best ERP / CRM system available in the market, based upon its ability to match business needs. Wircom Argentina chose Thymbra as they have vast experience in ERPs administration, and because Thymbra collaborates actively on the development and localization of Open ERP.
