AT A GLANCE

» Why Open ERP?

- Flexible
- different Module

» Benefits

- Multi-currencies accounting
- Management of standard processes (expense note, timesheet etc)
- Electronic invoicing/reconciliation in Switzerland via DTA and BVR banking
- Thorough commercial management (offers, CRM, etc..) with a large work of resumption of data.
- Complete flow of management of orders and deliveries (of products and services)

The implementation of Open ERP aimed at covering all the processes of the company and in particular resuming the use of their old CRM in an extensive way. Thus the sales management and follow-up of offers had specific importance.
